DATA SHEET

BENEFITS

UNLEASH THE PERFORMANCE
In the Unleashed version, the R610 is capable of supporting controller-less deployments for up to 25 access points and 512 client devices.

MU-MIMO: IMPROVES NETWORK PERFORMANCE FOR ALL CLIENTS
This cutting edge Wi-Fi technology, utilizes 802.11ac Wave 2 to communicate simultaneously with mobile devices. It improves overall network efficiency & throughput for even non-Wave 2 clients.

CHANNEL SELECTION OPTIMIZES THROUGHPUT
ChannelFly dynamic channel management, based on throughput measurements, not just interference, chooses the best channel to give users the highest possible throughput.

WIDER CHANNELS
Capability to support 80+80MHz/160MHz channels for higher bandwidth.

EXTENDED RANGE REQUIRING FEWER ACCESS POINTS
Adaptive antenna technology delivers up to 2x increase in Wi-Fi signal coverage minimizing the number of APs required to service any area.

ADAPTIVE POLARIZATION DIVERSITY (PD-MRC)
Dual-polarized antennas that are dynamically selected provide better reception for hard to hear clients and more consistent performance as clients constantly change orientation.

INVESTMENT PROTECTION
Flexible deployment options enable Ruckus AP’s to be supported across various management platforms: Unleashed, standalone, on-premise/virtual controller or Cloud-managed.

SLEEK, LOW PROFILE ENCLOSURE FOR EASE-OF-DEPLOYMENT
Aesthetically-pleasing design and a range of mounting options.

HIGH PERFORMANCE, 802.11AC WAVE 2 MID-RANGE SMART WI-FI ACCESS POINTS WITH ADAPTIVE ANTENNA TECHNOLOGY
Ruckus R610 Unleashed enables controller-less Wi-Fi architecture for small business environments with superior performance, lower costs and simplified management. Separate controllers and access point licenses are no longer needed, significantly reducing upfront costs. Set-up is also easy, thanks to a simplified web interface that helps businesses configure Wi-Fi in just 60 seconds.

The R610 Unleashed delivers high-performance and reliable 802.11ac wireless networking with MU-MIMO (Multi-User Multiple-Input Multiple-Output) capability. MU-MIMO helps boost network throughput by serving multiple clients simultaneously and also benefiting non-Wave 2 clients, thus improving overall network performance.

The R610 Unleashed, through its USB port, also enables IoT readiness for technologies like BLE, to help customers take advantage of upcoming IoT technologies.

Each R610 Unleashed integrates Ruckus-patented BeamFlex+, a software-controlled, high gain antennas that continually forms and directs each Wi-Fi packet over the best performing signal path.

Using dual-polarized antennas, the R610 Unleashed adapts in real time to anticipate hand-held device movement and rotation ensuring consistent performance.
MU-MIMO

MU-MIMO helps Wave 2 and non-Wave 2 clients. The R610 Unleashed can communicate simultaneously to multiple Wave 2 clients increasing network performance. This frees up airtime for non-Wave 2 clients resulting in enhanced aggregate network throughput.

ADVANCED WLAN APPLICATIONS

Each R610 Unleashed supports a wide range of value-added applications such as BYOD/guest onboarding, Dynamic PSK, hotspot authentication, wireless intrusion detection and many more. WLANs can be created and mapped to the same or different APs or VLANs. In a controller-less configuration, the R610 Unleashed works with a wide range of authentication servers including Microsoft’s Active Directory, LDAP, and RADIUS.

FLEXIBLE DEPLOYMENT OPTIONS

Ruckus Unleashed is custom-designed to help small business owners grow their business, deliver an excellent customer experience and manage costs while supporting Wi-Fi and a variety of mobile devices with minimal IT staff.

Unleashed access points have built-in controller capabilities, including user access controls, guest networking functions, advanced Wi-Fi security and traffic management.

As businesses grow to multiple sites or a larger scale deployment, Ruckus offers an easy migration path to a controller-based Wi-Fi, using the same Wi-Fi access points.

COMPLETE LOCAL AND REMOTE MANAGEMENT

R610 Unleashed can be securely managed from anywhere, at anytime, using any browser on any device.

MULTI-USER MIMO (MU-MIMO)

802.11ac MU-MIMO allows the R610 Unleashed to transmit multiple spatial streams to multiple client devices simultaneously, increasing the total throughput and capacity of the wireless network. The R610 Unleashed is able to provide up to three clients each their own dedicated full-bandwidth channel using an MU-MIMO technique known as spatial reuse. This capability enables several benefits.

Efficient use of available spectrum effectively multiplies the total capacity of a network, allowing it to meet the increasing data demand driven by the proliferation of mobile Wi-Fi clients and data-hungry applications and uses such as high-definition video streaming. Additionally, MU-MIMO does not require client devices to time-share connections with other clients on the network as in legacy Wi-Fi, which means each device experiences less wait time and makes the network more responsive overall. Even legacy clients benefit from MU-MIMO on the wireless network, because substantially increased efficiency for MU clients leaves the network with more free time and capacity by supporting multiple users.
